The College of Business is in the process of applying for AACSB accreditation. As part of that process, students will be assessed on program level outcomes based on course outcomes from various courses. The materials from this course may be used for assessing such program level outcomes, and hence students must follow the necessary rigor to ensure mastery of the above course outcomes.

Course Requirements every student must fulfill in order to succeed in course:

Demonstrate an understanding of the framework used to link the economic characteristics and strategies of a firm, its financial statements, and assess a firm’s current and forecasted profitability and risks. Explain the relationship between risk and returns.

1. Students should check the Course Calendar, Announcements, and Messages (e-mail) systems in Blackboard on a regular basis.
2. Students should keep current with all course assignments, quizzes, and examinations.
3. If the course uses remote proctoring for exams, students must schedule their exam early in the semester.
4. Students should ask questions and communicate with the instructor either in class, online, off-line or during office hours.
5. For all classwork, exams, quizzes etc., if a student is completing it off-campus, then they are responsible for availability of internet connectivity. Extensions will not be granted for lack of availability of internet connections.
6. Students should remember that hybrid and Hyflex courses assume greater responsibility and independent learning skills by the student for their own learning outcomes.
7. For Hyflex courses, students should keep current on class recordings, if not attending the live class (either in person or online).
8. For Hyflex courses, students are not required to come to class, even for proctored examinations.
 - a. The instructor can require students to physically sit for an examination in a proctored environment at the facilities of university testing services – setup of exam is responsibility of the student.
 - b. The instructor can require students to take examinations using proctoring software as indicated in the Proctored Exams section.
 - c. The instructor decides which type of examination works best for the class and the student must comply with their instructions – as long as they are not required to take an in-class examination, or are required to take the examination at one specific time that applies to all students. In other words, the instructor will offer the student some flexibility on test location and the time to sit for the examination. Instructors should allow 72 hours for students to complete any examination.

Grading Policy: The final course grade will be based on your performance on the exams, assignments and class participation using the following weights:

The exam/quiz materials will come from lecture notes, the text, and class discussions. Questions will emphasize understanding and applications of concepts and topics covered in class.

Students are expected to exhibit a high level of honesty and integrity in their pursuit of higher education. Students engaging in an act that violates the standards of academic integrity will find themselves facing academic and/or disciplinary sanctions. Academic misconduct is any act, or attempt, which gives an unfair advantage to the student.
