Course Description

This course is an introduction to photography for the general student and assumes no prior experience in photography. Through the development of critical thinking and technical skills, students will learn how to visualize, create, and evaluate photographic images. Techniques covered will include basics of camera operation, digital photo editing, photographic genres, and introduction to critical and theoretical practices. In addition to studio practices such as technical demonstrations, studio assignments, group critiques, and collaborative assignments we will also engage with photographic theory through readings, presentations, and discussions.

Learning Outcomes

Upon successful completion of this course student will...

- Be familiar with basic camera operation including shutter speed, aperture, ISO, white balance, focus, etc.
- Understand photographic genres and their conventions.
- Be able to work collaboratively in the production and exhibition of photographic images.
- Be able to participate in constructive criticism and implement those critiques in their own work.
- Have a basic understanding of the history of the photographic medium.
- Have a basic understanding of the critical discourse and theory formed by and around the photographic images.

Course Assignments

Weekly Photography Assignments: 70%

Each week you'll be required to take at least 100 pictures. This may sound like a lot but with digital technology it will go more quickly than you might think. It's also important to take a lot of pictures because photography, like all arts, is a practice. For each assignment I'll provide an assignment sheet with a rubric explaining what's expected in the assignment and giving tips about how to be more successful. At each stage of your assignments you'll post images to your TAMUSA OneDrive so that I can review them to calculate your grades.

Notes: 10%

Class notes are designed to help you keep track of key information, organize class content and support classroom activities. Notes will be required in response to classroom lectures and demos, and content that you engage with outside of class, for example artist videos. It is important to develop a practice of note taking during these experiences because notes are a valuable resource which you can refer to and refresh your memory. They encourage you to be an active recipient of information.

Classroom Discussions, Presentations and Experiments: 10%

Starting week 4, students will be presenting different experimental techniques. The presentations will outline some historical and contemporary examples of the technique, a basic how-to demonstration and a class written class assignment. The rest of the class will be dedicated to experimenting with the technique. 50% of this grade is based on your presentation and 50% is dependent on participation in the class experiments presented by other students.

Final Project: 10%

For our final project, we will be exploring the creative process itself. We will consider convergent vs divergent thinking, top-down vs bottom-up production, and the relationship between control and chance. Each step of this project will be revealed as we go.

Grading & Attendance

Work is primarily based on completion and engagement. You do not need prior knowledge of art and photography to do well in this class. You will need to participate in classroom activities, complete outside of classwork, and show the ability to use feedback productively.

Grading Scale:

A.....	100 - 90	D.....	69 - 60
B.....	89 - 80	F.....	59 and Below
C.....	79 - 70

- For the first half of the semester, projects will be accepted for full credit any time before midterm as long as the student is demonstrating a continued effort.* In the second half of the semester, projects will be accepted for full credit at any time before our final class meeting (the last class before finals week), again as long as the student is demonstrating a continued effort.*
- Student can lose up to 15% credit for each studio day missed during a project.
- Assignments that require instructor feedback cannot be made up for credit.
- NO EXTRA CREDIT - Complete the that is assigned.
-

*Continued effort is defined as ongoing communication with the instructor and evidence of work being completed.

Attendance:

- After 4 absences, each additional absence may drop your final grade by up to 5%.
- Students have 7 or more absences are advised to drop this course to protect your GPA.
- You are only permitted a total of 6 drops without penalty in your undergraduate career. The 7th drop will be calculated as an F in your GPA. Be cautious about casually dropping classes.
- Arriving late or leaving class early may be considered an absence.

Basic Expectations:

Standards of Campus Conduct: Members of the University community assume full responsibility for compliance with Texas laws and for proper self-conduct. In addition to behaving according to the ordinary conventions of adult society, members of the University community are bound by University rules, procedures, administrative procedures, handbooks, catalogs and other university approved directives conducive to creating a positive campus atmosphere and general academic well-being.

The code for student conduct is set forth in the Student Handbook. Specific attention is given there to rules addressing academic misconduct, hazing, sexual harassment and substance abuse, including alcohol abuse and the illicit use of drugs. Grievance procedures and guidelines for sanctions are outlined.

When students engage in behavior that the professor deems to be disruptive to the learning environment of the class- room the professor will first verbally prompt the student to stop their behavior, if the behavior is especially gratuitous or persistent the professor may ask the student to leave the classroom (resulting in an absence), or drop the student from the course.

Academic Dishonesty:

Students are expected to do their own course work. Simple cases of first offense cheating or plagiarism by an individual student may be handled by the instructor after consultation with the department chair. The student is usually confronted with the evidence in private and advised of the penalty to be assessed. The evidence will be retained for at least one full year. For more serious cases, such as those involving repeated offenses, conspiracy with other students or the theft and selling of examination questions, a report should be made by the instructor via the department chair and college dean to the Office of Student Rights and Responsibilities. Academic dishonesty is a violation of the Student Code of Conduct; therefore, the instructor may report any form of academic dishonesty to the Office of Student Rights and Responsibilities. Please review the Student Handbook for a complete description of the process.

Use of any AI-generated content in this course qualifies as academic dishonesty and violates Texas A&M-San Antonio's standards of academic integrity. The university will provide such reasonable modifications to pregnant students as would be provided to a student with temporary medical condition that are related to the health and safety of the student and the student's unborn child. These could include maintaining a safe distance from substances, areas, and activities known to be hazardous to pregnant individuals and their unborn child; excused absences because of illness or medical appointments; modified due dates for assignments; rescheduled tests/exams; taking a leave of absence; and being provided access to instructional materials and video recordings of lectures for excused absences, if these would be provided to any other student with an excused absence. 2. Each student shall have the right to participate in all areas and activities of the University, free from any form of discrimination, including harassment, on the basis of race, color, national or

ethnic origin, religion, sex, disability, age, sexual orientation, gender identity, gender expression, and pregnancy/parenting or veteran status in accordance with applicable federal and state laws.

3. A student has the right to personal privacy except as otherwise provided by law, and this will be observed by students and University authorities alike.
4. Each student subject to disciplinary action arising from violations of university students' rules shall be assured a fundamentally fair process.

Students' Responsibilities

1. A student has the responsibility to respect the rights and property of others, including other students, the faculty, and administration.
