Course Description

By focusing on academic expectations, success strategies, and career exploration, this course equips first-year students with the skills needed for a successful transition to university life. Students will learn to access and utilize campus resources, develop self-awareness and personal agency, and practice habits that foster responsibility and engagement. The course also encourages active participation in the campus community as students build a foundation for their academic and personal goals.

Course Promises (Course Learning Outcomes)

This course makes a set of promises to you (assuming you fulfill the expectations on pg. 2). By the end of the semester, you should be able to:

1. Exhibit growth in self-awareness, agency, and personal responsibility.
2. Adapt and apply appropriate academic strategies to courses and learning experiences.

3. Identify and apply strategies to effectively manage time and priorities.
4. Identify relevant academic policies, processes, and resources relevant to academic success.
5. Develop goal-setting strategies to enhance academic and career readiness.

Attend class

Attendance and Participation (150 Points)

Attendance and participation are worth 150 points of your final grade. You will earn points throughout the semester by **attending class, arriving on time, participating in discussions and activities, and engaging with course content.**

Attendance points cannot be made up for unexcused absences. Because much of the learning in this course occurs through in-class interaction, students who are absent will also miss opportunities to complete participation activities and earn associated points.

Excused Absences: Students are expected to attend all class sessions. An absence may be considered excused for the following reasons:

- University-sponsored activities that require the student's participation
- Religious days as recognized by university policy
- Military service obligations
- Serious illness, medical emergencies, or hospitalization of the student
- Death or serious illness of an immediate family member
- Other circumstances required by university policy or approved by the instructor
- Whenever possible, students should notify the instructor in advance of an anticipated absence. Documentation may be requested for excused absences.
- Excused absences do not result in disciplinary action; however, attendance and participation points associated with missed class sessions generally cannot be earned without completing an alternative assignment. The alternative assignment is at the discretion of the FYS faculty member.
- **While students may encounter circumstances that require them to miss class, accumulating more than four absences for any reason may result in removal from the course.**

Be attentive and participate in class

I expect all students to actively participate during class both verbally and nonverbally. Participation does not simply mean speaking, although that is essential. I realize there are a variety of ways students can participate (e.g., following

discussions with your eyes and ears, asking questions, sharing, reading, writing, individual reflection, presenting, collaboration). I hope that you will strive to stretch yourselves beyond your preferred ways of learning and your comfort zone. I encourage you to contribute thoughtful comments and questions, as well as to listen carefully to your peers' contributions and respectfully respond to others' comments. The success of our mutual learning from each other depends upon preparation and active participation in all aspects of the course.

Complete required assignments in a timely manner

Assignments provide you with both informal and formal opportunities to articulate your responses to the issues and topics we will discuss. You will get the most out of the course if you turn in your work on time. Extensions require at least a full day's advance notice prior to due dates and approval from me. It is vital that you follow basic grammar rules to get full credit for assignments. No matter how short or long the response is, make sure you check the grammar and standards of academic writing. All responses are a reflection of you and are intended to prepare you for academic and professional writing.

Late Work Policy:

Expectations are assignments that are to be completed on time. Please get with FYS instructor or peer leader if there is an issue with deadlines. We understand that life will happen.

Assignments and Evaluations

To be successful in this course, you are expected to complete all assignments on time. Assignments must be submitted to the correct location to be considered on time. Assignments will be graded based on quantity and quality.

The majority of assignments will be completed during class. If you miss an in-class assignment, meet with your Instructor, Peer Leader, or a classmate to catch up on any work you may have missed.

Students' Rights and Responsibilities: The following statement of students' rights and responsibilities is intended to reflect the philosophical base upon which University Student Rules are built. This philosophy acknowledges the existence of both rights and responsibilities, which is inherent to an individual not only as a student at Texas A&M University-San Antonio but also as a citizen of this country.

Students' Rights

1. A student shall have the right to participate in a free exchange of ideas, and there shall be no University rule or administrative rule that in any way abridges the rights of freedom of speech, expression, petition and peaceful assembly as set forth in the U.S. Constitution.
2. Each student shall have the right to participate in all areas and activities of the University, free from any form of discrimination, including harassment, on the basis of race, color, national or ethnic origin, religion, sex, disability, age, and pregnancy/parenting or veteran status in accordance with applicable federal and state laws.
3. A student has the right to personal privacy except as otherwise provided by law, and this will be observed by students and University authorities alike.
4. Each student subject to disciplinary action arising from violations of university student rules shall be assured a fundamentally fair process.

Students' Responsibilities

1. A student has the responsibility to respect the rights and property of others, including other students, the faculty, and administration.
2. A student has the responsibility to be fully acquainted with the published University Student Rules found in the Student Handbook, [Student Code of Conduct](#), on our website, and University Catalog, and to comply with them, as well as with federal, state, and local laws.
3. A student has the responsibility to recognize that student actions reflect upon the individuals involved and upon the entire University community.
4. A student has the responsibility to recognize the University's obligation to provide a safe environment for learning.
5. A student has the responsibility to check their university email for any updates or official university notifications.

We expect that students will behave in a manner that is dignified, respectful, and courteous to all people, regardless of sex, ethnic/racial origin, religious background, or disability. Conduct that infringes on the rights of another individual will not be tolerated.

Students are expected to exhibit a high level of honesty and integrity in their pursuit of higher education. Students engaging in an act that violates the standards of academic integrity will find themselves facing academic and/or disciplinary sanctions. Academic misconduct is any act, or attempt, which gives an unfair advantage to the student. Additionally, any behavior specifically prohibited by a faculty member in the course syllabus or class discussion may be considered as academic misconduct. Use of Generative AI Permitted Under Some Circumstances or With Explicit Permission

There are situations and contexts within this course where you may be asked to use artificial intelligence (AI) tools to explore how they can be used. Outside of those circumstances, you should not use AI tools to generate content (text, video, audio, images) that will end up in any student work (assignments, activities, discussion responses, etc.) that is part of your evaluation in this course. Any student work submitted using AI tools should clearly indicate with attribution what work is the student's work and what part is generated by the AI. In such cases, no more than 25% of the student work should be generated by AI. If any part of this is confusing or uncertain, students should reach out to their instructor for clarification before submitting work for grading. Use of AI-generated content without the instructor's permission and/or proper attribution in this course qualifies as academic dishonesty and violates Texas A&M-San Antonio's standards of academic integrity.
