1. Students should check the Course Calendar, Announcements, and Messages (e-mail) systems in Blackboard on a regular basis.
2. Students should keep current with all course assignments, quizzes, and examinations.
3. If the course uses remote proctoring for exams, students must schedule their exam early in the semester.
4. Students should ask questions and communicate with the instructor either in class, online, off-line or during office hours.
5. For all classwork, exams, quizzes etc., if a student is completing it off campus, then they are responsible for availability of internet connectivity. Extensions will not be granted for lack of availability of internet connections.
6. Students should remember that online and hybrid courses assume greater responsibility and independent learning skills by the student for their own learning outcomes.
7. For online courses, students should keep current on class recordings, if not attending the live class (either in person or online).
8. For online asynchronous courses, there will be no online class sessions. All materials will be made available through Blackboard or through online links.
9. For online synchronous courses, there will be online class sessions as indicated. Students are expected to attend the online session at the given time. If a student is unable to attend a session, the instructor will make the recording of the session available for the student to view. All materials will be made available through Blackboard or through online links.

**Grading Policy:** The final course grade will be based on your performance on the quizzes, exams, assignments and class participation using the following weights:

|                  |            |
|------------------|------------|
| Assignments      | 30%        |
| Discussion Posts | 20%        |
| Exams (2)        | 30%        |
| Final Project    | <u>20%</u> |
| Total            | 100%       |

The final letter grades will be assigned as follows: Above 90%  $\Rightarrow$  A; 80 – 89%  $\Rightarrow$  B; 70 – 79%  $\Rightarrow$  C; 60 – 69%  $\Rightarrow$  D; Below 60%  $\Rightarrow$  F.

This course has a requirement of a grade of C as a minimal grade for satisfactory completion of this course.

**Examinations:** There will be 2 mandatory midterm exams, and a mandatory final exam (as per university schedule). Being absent for an exam will result in a grade of zero for that exam and may result in a fail grade in the course. The exams will consist of conceptual multiple-choice questions, problem solving questions, and short essay questions. The exam materials will come from lecture notes, the text, the homework, and class discussions. Questions will emphasize understanding and applications of concepts and topics covered in class.

**Assignments:** There will be 5 take home assignments during the course. Individual assignment statements and due dates will be posted through Blackboard. For all assignments, ALL intermediate work of the problem solution steps MUST be shown. This includes the use of the formula, the values substituted in the formulas for problem solution, as well the intermediate steps of the arithmetic computation. The units of measurement are extremely important and MUST be shown at each stage of the computation. Considerable points will be taken off for not following these requirements.

**Discussion:** There will be 4 discussion posts centered around certain economic topics, and the country you select for your final project. You will be given information on what will be covered and the format a week prior to help you prepare. This task is to help you gather information throughout the semester for your final project.

**Project:** There will a mandatory final project due at the end of the semester and discussed throughout the semester. You will select a country of your choosing (pending approval), outside of North America, and create a PowerPoint presentation detailing certain economic data. Information on the requirements and grading breakdown for this project will be discussed in class and posted on Blackboard.

**Use of Generative AI Permitted Under Some Circumstances or With Explicit Permission:**

There are situations and contexts within this course where you may be asked to use artificial intelligence (AI) tools to explore how they can be used. Outside of those circumstances, you should not use AI tools to generate content (text, video, audio, images) that will end up in any student work (assignments, activities, discussion responses, etc.) that is part of your evaluation in this course. Any student work submitted using AI tools should clearly indicate with attribution what work is the student's work and what part is generated by the AI. In such cases, no more than 25% of the student work should be generated by AI. If any part of this is confusing or uncertain, students should reach out to their instructor for clarification before submitting work for grading. Use of AI-generated content without the instructor's permission and/or proper attribution in this course qualifies as academic dishonesty and violates Texas A&M-San Antonio's standards of academic integrity.

**Make up and Late Assignment/Exam policy:**

As a general rule, make-ups or late submissions will NOT be offered or accepted for any missed assignments/exams. Late submissions or make-ups may be accepted/administered only in extra-ordinary circumstances such as an excused official university activity, a severe illness, or a dire emergency. However, you must provide comprehensive documentation either before or within a few days of the missed assignment/ exam.

**Class Conduct and Civility Code:** Everyone in class is expected to follow all rules in the student handbook, as well as common courtesy during classroom lectures and discussions in class and online, including the following:

1. It is the students' responsibility to obtain and be able to use the required materials and software for this class.

2. Student must retain copies of all assignments and graded work for verification purposes and provide it to the instructor, if necessary. Keep own copies of all computer files and e-mails till final grade is received.
3. Talking while the instructor is lecturing is extremely disruptive and discourteous to the instructor and other students.
4. Using computers or phones (except for a valid urgent need) during class for a purpose not related to class is disruptive. All cell phones and gadgets should be turned OFF and headphones removed.
5. For any questions about the exams and assignments, a student should contact the instructor, well in advance of the day they are due, so the instructor may have enough time to provide feedback.
6. All communications will be via e-mail communications to the Texas A&M University e-mail account, and students are expected to use their school provided email account. The instructor will reply to a student e-mail messages and voice messages within 2 business days (Monday-Friday).
7. All assignment submissions must be uploaded to Blackboard by the due date and time. Submission window may close or marked late, even if late by one second.\

Anyone violating these policies may be subject to disciplinary actions.
