Grading

A recitation has two possible final grades: CR (credit) or NC (no credit). To receive the CR grade for the recitation, a student must attend and participate fully at least 75% of the recitation meetings (at least 11 out of 14 total recitation meetings). That probably will not be sufficient attendance to pass the lecture portion of the course, MATH 2312, since there will be 11 Weekly Quizzes administered during recitation meetings and those quizzes will be applied to your grade for MATH 2312.

Artificial Intelligence (AI) policy

Option 1 - No Use of Generative AI Permitted

MATH 2012 assumes that all work submitted by students will be generated by the students themselves, working individually or in groups. Students should not have another person/entity do the writing of any portion of an assignment for them, which includes hiring a person or a company to write assignments and/or using artificial intelligence (AI) tools like ChatGPT. Use of any AI-generated content in this course qualifies as academic dishonesty and violates Texas A&M-San Antonio's standards of academic integrity.
