Course Description (Developing MS Biology Thesis):

This course enables dedicated hours for research activities, including written and oral communication, research design, lab work and data analyses, that will lead to a written thesis. The preparation and defense of a master's thesis is the culminating experience in the M.S. in Biology Program. Students are expected to work with a high level of self-motivation. Successful students exercise initiative and exhibit strong communication skills in working with their advisors and committee members. This course requires individual effort that is overseen by Thesis Advisor/Committee Chair. Weekly or bi-weekly meetings will be held to discuss progress and review submitted documents. Once the research, necessary analysis and/or results compilation are completed, the thesis proposal or thesis chapter(s) will be written and revised iteratively between the student and thesis advisor until the document(s) is/are ready for submission to the Thesis Committee. If the committee agrees, then research activities should commence / continue (e.g., with approved thesis proposal) or a thesis Defense will be held (Note: Thesis should be submitted to Committee no later than 2-3 weeks prior to proposed thesis defense date).

Prerequisites: Graduate status in MS Biology, thesis track, and establishment of graduate advisory committee.

Recommendation: To repeat this course (>3 CR), students should have an approved Thesis Proposal on record. Course may be repeated up to 3 times.

Required: Instructor Approval.

Course Objectives:

1. Identify and apply effective scientific writing styles; critically evaluate written work and refine academic writing skills.
2. Conduct a comprehensive literature review to establish the background, rationale, and significance of the proposed research.
3. Develop and execute research project that demonstrates critical thinking and use of knowledge and skills for biological data analyses, interpretation and communication.
4. Describe thesis research clearly and succinctly, in written and oral forms, to faculty, mentors, and potential sponsors.

All topics will be covered as discussion based and/or experiment based. Pre-readings of instructor presented materials will be needed. There will be no final exam for this course. Mid-term and final grade will be cumulative based on each week's performance, discussions, presentations and proposal development

Course Policies:

Expectations: Personal and academic integrity, to be open to new ideas, and to share in a community where individuals from diverse backgrounds and cultures help one another grow intellectually, socially, and personally

is always expected throughout the course. TAMUSA faculties are here to help; however, students must take responsibility for their own learning. Students should strive for a high level of academic performance and to be responsible, respectful, contributing citizens within the university and in outside communities. Above all, students should develop a love of learning that will last a lifetime, along with a life-long interest in maintaining emotional and physical wellness.

Assessment: There are no formal assignments in this course. In consultation with your Thesis Advisor, students develop a personal work schedule with specified deliverables. Weekly or bi-weekly individual meetings will be held to discuss submitted deliverables and revise the work plan if needed. Completion of this course is determined when each member of the Thesis Committee approves the proposal and/or thesis. After thesis defense, Thesis Approval form is signed after successful completion of the oral defense and acceptance by each committee member of the thesis document.

Blackboard and Course Communication: All grades will be posted and accessible through the course's Blackboard site. Students must login regularly to both the Blackboard site and to their TAMUSA email account to keep updated on information or changes related to the class. Each student MUST have an active TAMUSA e-mail account. The preferred method of communication will always be e-mail or making an appointment (in person or virtually).

Students' Rights and Responsibilities: The following statement of students' rights and responsibilities is intended to reflect the philosophical base upon which University Student Rules are built. This philosophy acknowledges the existence of both rights and responsibilities, which is inherent to an individual not only as a student at Texas A&M University-San Antonio but also as a citizen of this country.

Students' Rights

1. A student shall have the right to participate in a free exchange of ideas, and there shall be no University rule or administrative rule that in any way abridges the rights of freedom of speech, expression, petition and peaceful assembly as set forth in the U.S. Constitution.
2. Each student shall have the right to participate in all areas and activities of the University, free from any form of discrimination, including harassment, on the basis of race, color, national or ethnic origin, religion, sex, disability, age, and pregnancy/parenting or veteran status in accordance with applicable federal and state laws.
3. A student has the right to personal privacy except as otherwise provided by law, and this will be observed by students and University authorities alike.
4. Each student subject to disciplinary action arising from violations of university student rules shall be assured a fundamentally fair process.

Students' Responsibilities

1. A student has the responsibility to respect the rights and property of others, including other students, the faculty, and administration.
2. A student has the responsibility to be fully acquainted with the published University Student Rules found in the Student Handbook, [Student Code of Conduct](#), on our website, and University Catalog, and to comply with them, as well as with federal, state, and local laws.
3. A student has the responsibility to recognize that student actions reflect upon the individuals involved and upon the entire University community.
4. A student has the responsibility to recognize the University's obligation to provide a safe environment for learning.
5. A student has the responsibility to check their university email for any updates or official university notifications.

We expect that students will behave in a manner that is dignified, respectful, and courteous to all people, regardless of sex, ethnic/racial origin, religious background, or disability. Conduct that infringes on the rights of another individual will not be tolerated.

Students are expected to exhibit a high level of honesty and integrity in their pursuit of higher education. Students engaging in an act that violates the standards of academic integrity will find themselves facing academic and/or disciplinary sanctions. Academic misconduct is any act, or attempt, which gives an unfair advantage to the student. Additionally, any behavior specifically prohibited by a faculty member in the course syllabus or class discussion may be considered as academic misconduct.
