11 - Do you have any suggestions on the course or instruction that would improve student learning?

Response Rate	4/18 (22.22%)
<ul style="list-style-type: none"> N/A I appreciate how this class was set up for all of us to have a discussion and an opinion about the topics. Hearing points of views from not only my professor but my peers made a difference in grasping the content of the class. I believe this was overall one of my favorite classes this semester. The only suggestion I can think of is to reduce the page requirement for the annotated bibliography. I tend to write rather concisely and found myself having to go back and add a lot of "fluff" to meet the page count. Or, maybe fewer articles that are required. 12 felt like a lot, 10 would be less stressful. Would like the course or even the program to be set in an 8 week program much like what Grand Canyon University uses. 	

12 - Do you have any additional comments?

Response Rate	5/18 (27.78%)
<ul style="list-style-type: none"> N/A Thank you for a great semester! I think Dr.Wooten was an incredible professor. While his teaching style is less structure than say Dr.Hudson who I also loved having class with this year. He kept his classes simple and to the point. He engaged the class and really helped me understand the content. I always left class feeling enlightened about the topic from both Dr.Wooten and my classmates. I think it goes to show that these classes can be taught in different styles so long as the professor is communicative, humble, and realistic in their expectations of their students. I really enjoyed getting to learn from Dr.Wooten this semester. Great course! Great job facilitating dialogue around different theories. Thank you for ypur time in this course.
